What Is Report Pro

ReportPro replaces the old reporting tab. ReportPro allows simple customization of reports to fit specific users needs allowing adding/removing columns and unlimited grouping and filtering. In short, it allows you to customize the current report list the way YOU want them. It can also be used as an MSO enabled advanced reporting system.

ReportPro generally mirrors the Reporting tab. Because of the flexibility in customizing reports, some reports have been combined.

Setting Up Report Pro

When you first log in to ReportPro, you will need to set your location(s). To do so, highlight "Local Host" click on the "E" for Edit and 1) Name the Location: and 2) Type in the IP Address and port that you see on the SummitCRS Login screen and the DBName that matches the DBName in the Summit client setup (this can be launched by clicking on the blue IP address on the login screen).

Click save and then you can highlight the location name and click "C" for Click the (C) to connect. You will see the folder with a green checkmark on it that will indicate it is connected. If there is NOT a green check on the folder, the location is NOT active.

Report Pro Basics

- "E" is to Edit locations
- "R" is to Remove locations

**NOTE: not all reports are Closed Date driven: here is a list: http://www.summitcrs.net/pdf/reportsguide.pdf

You can also filter by WIP Departments.

By checking the "Export" box you can choose to export the chosen report to: CSV, Txt, Excel, XML or HTML

Pre-Processing

By checking the Pre-Processing box prior to running a report it will launch the Pre-Processing screen that allows you to filter as you'd like prior to printing the chosen report.

MSO Features

Roll-Up Reporting for multiple shops.

Add all your shops to run reports. OR, you can filter in/out shops by clicking on the drop-down arrow in the "C Location" row and checking the ones you choose.

Finally, if you have so many locations that you cannot see all of them in the setup screen, you can simply click the +/ to the right of the "C Location" row to Expand/Collapse the Location List
