EDM

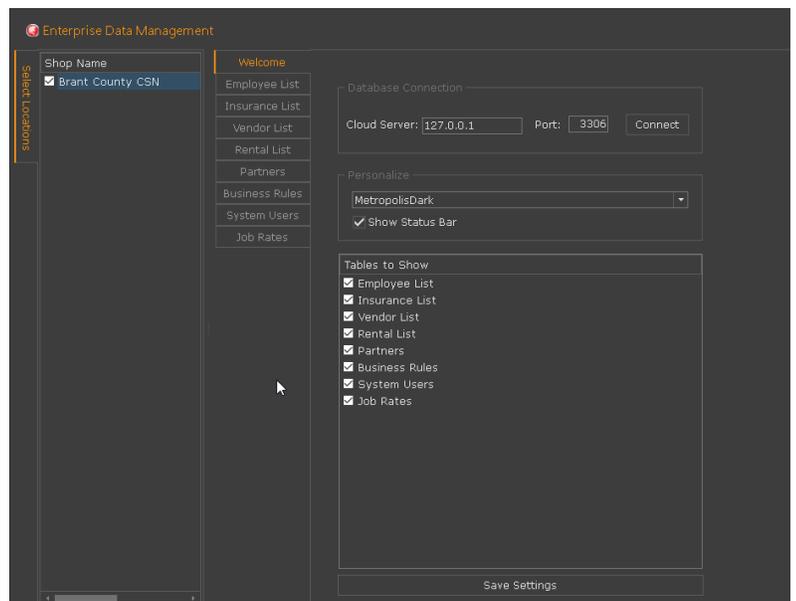

- Enterprise Data Manager
- Customizable interface
- Remote access to data
- Manage multiple locations

EDM

Have you ever been frustrated by not being able to access your shops data from multiple locations, or share your data with 3rd party vendors? Look no further! EDM allows you to manage your data for all shop locations from a single point. You will also find that you can easily transfer or share information between locations with the touch of a button.

Enterprise Data Management:

- Add users across multiple locations
- Instantly share data between vendors
- Remotely access & update shop data
- Customizable business rules to fit all your shops needs
- Personalized themes for a custom layout, look and fit
- Customizable job rate tables

The screenshot shows the 'Enterprise Data Management' application with the 'Employee List' selected. The 'Summary List' table displays employee data across two locations: 'Test Auto Body - Boise' and 'Test Auto Body - Meridian'.

Code	Name	Test Auto Body - Boise	Test Auto Body - Meridian
JJN	Josh Peck	<input checked="" type="checkbox"/>	<input type="checkbox"/>
